# Tessere: festa in testa!

Arte e geometria con l'origami

di Rosa Laddago

Tutto ebbe inizio in una mattina di primavera del 2018  
La prima idea fu quella di realizzare una tessera mobile che avesse al suo  
interno un effetto decorativo geometrico  
poi si aggiunse anche l'idea di provare ad invertire i colori per gustarne  
l'effetto cromatico. Ebbero così vita le tessere Primavera.

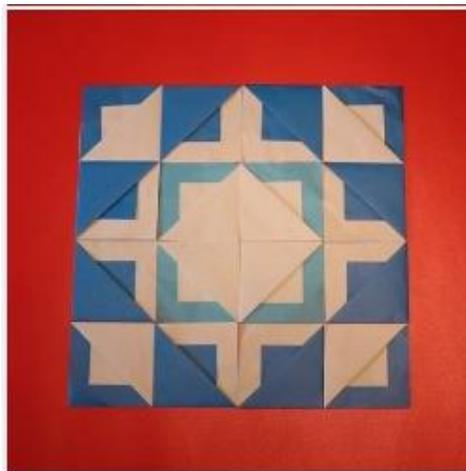

# Seguirono altri abbinamenti

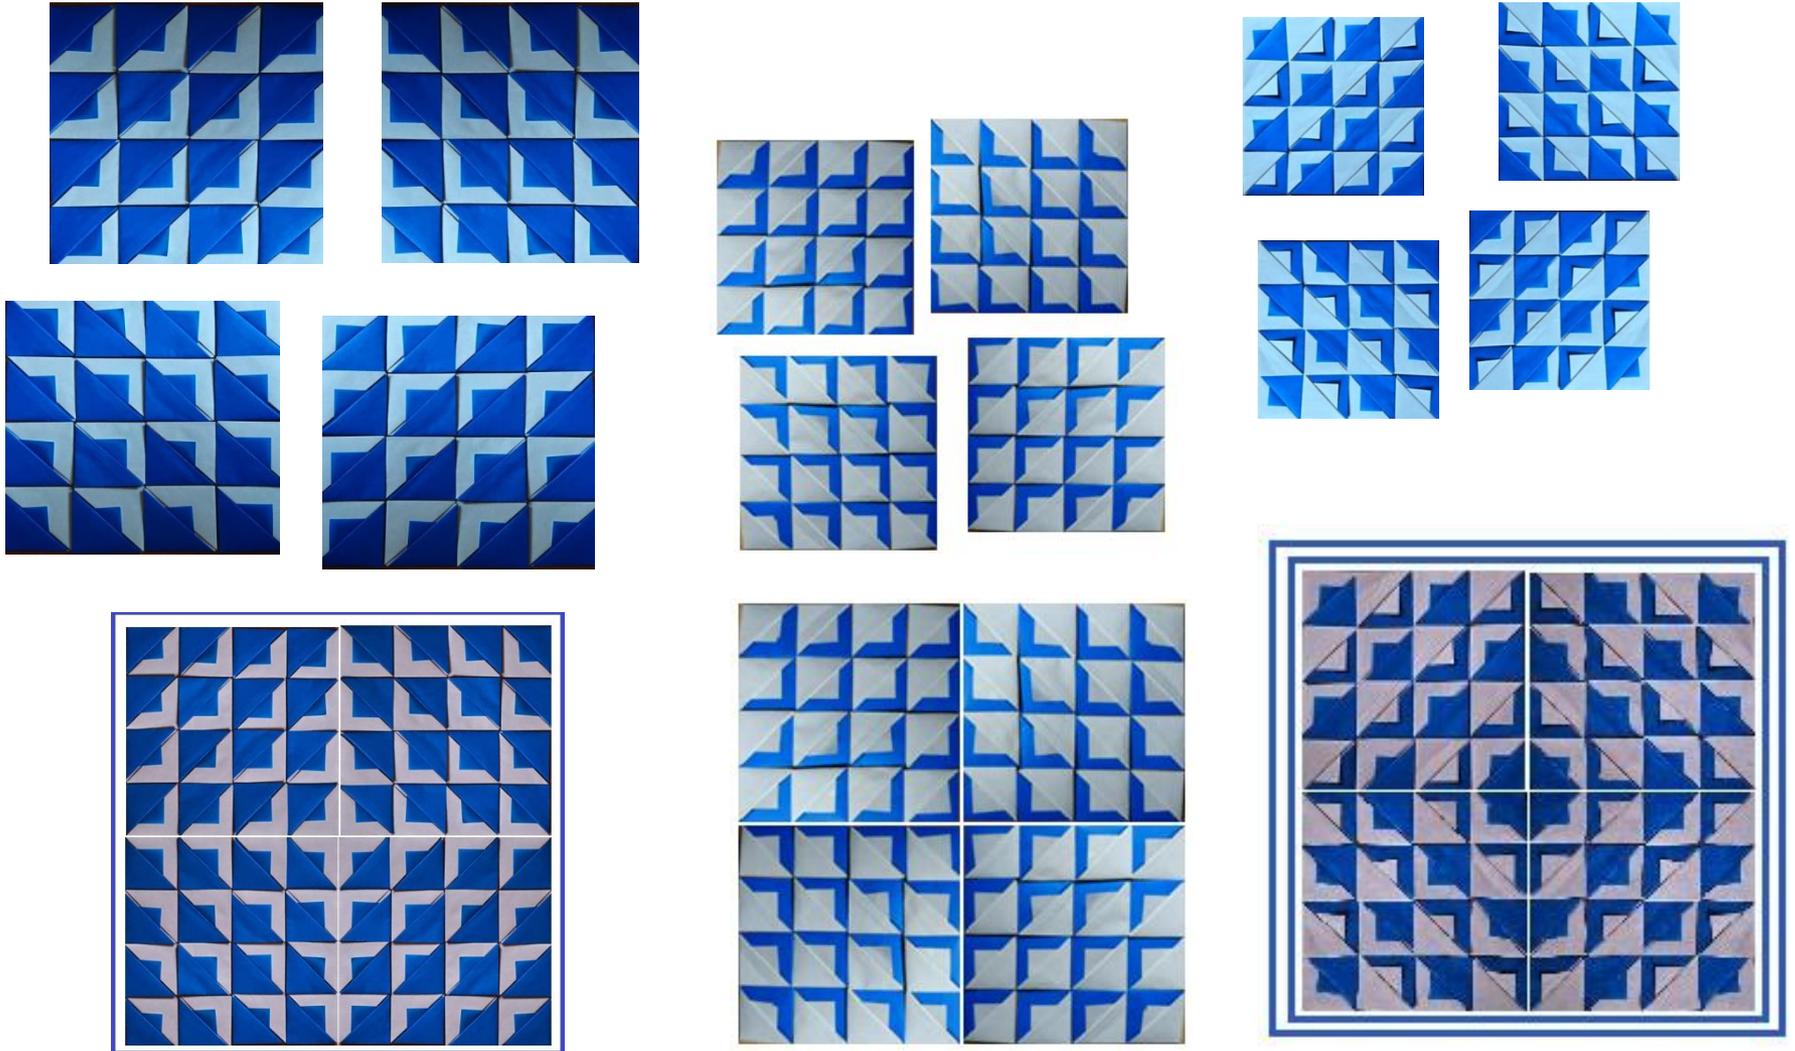

- Ruotando
- Ribaltando
- Traslando
- Realizzando simmetrie

Alla prima forma se ne aggiunsero poi altre con la realizzazione di piccole modifiche e la possibilità di costruire sempre nuovi mosaici e poter riflettere su peculiarità geometriche

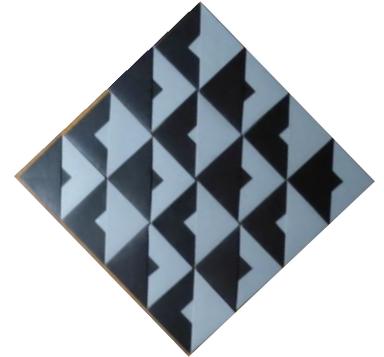

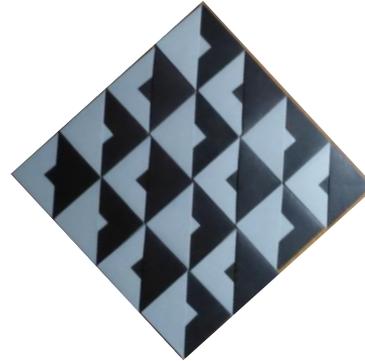

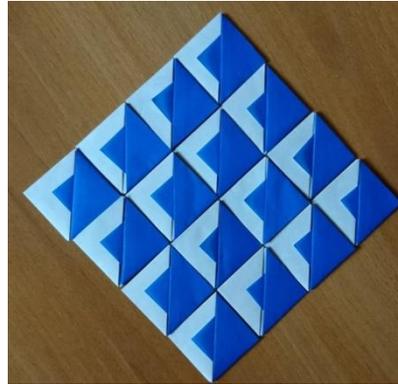

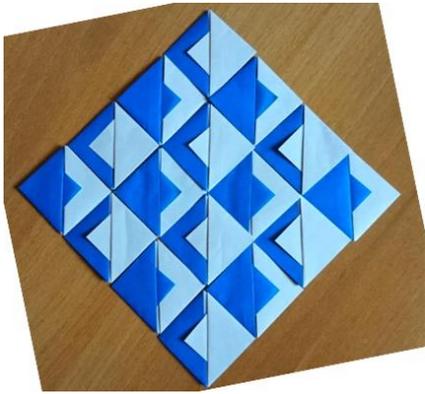

Progettare attraverso l'uso di semplici software (paint): ruotare di 90° di 180°, capovolgere orizzontalmente o verticalmente e vederne il risultato

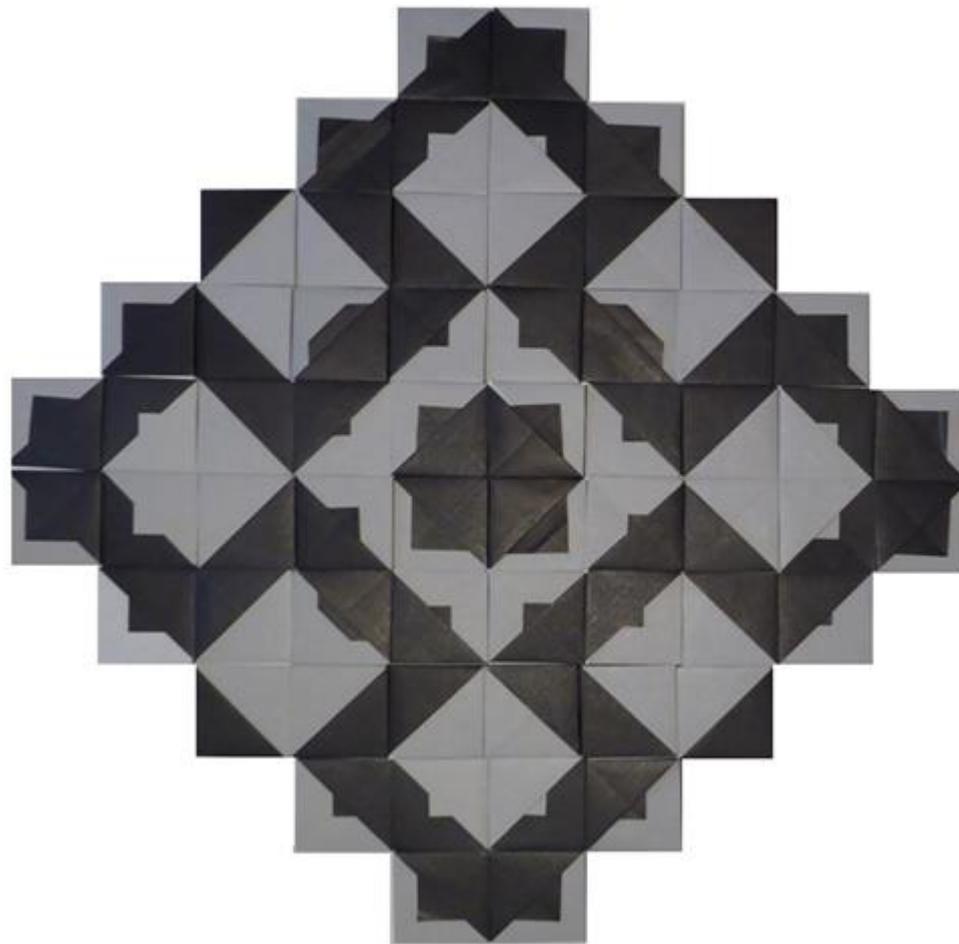

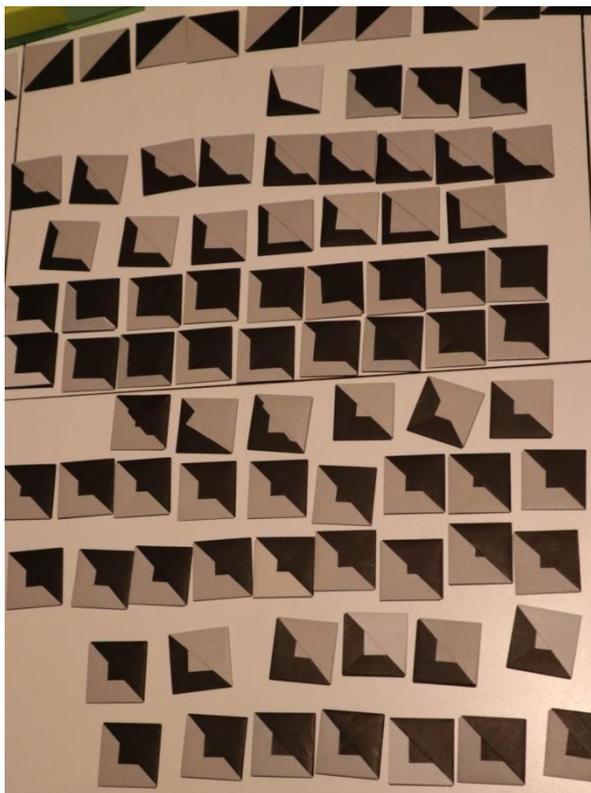

# Positivo / negativo

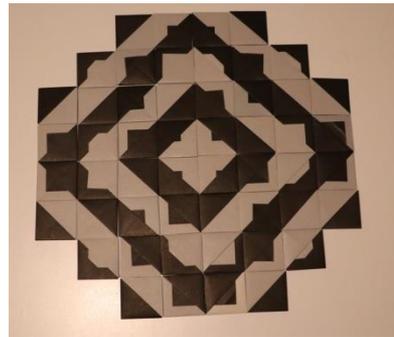

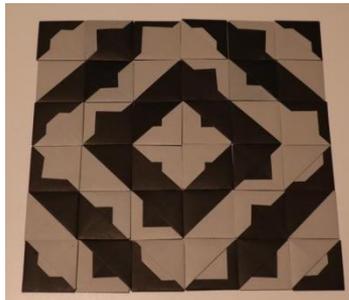

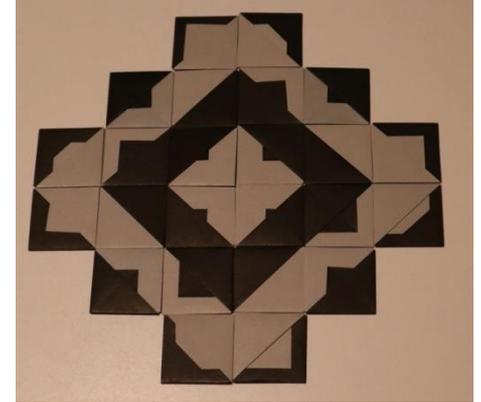

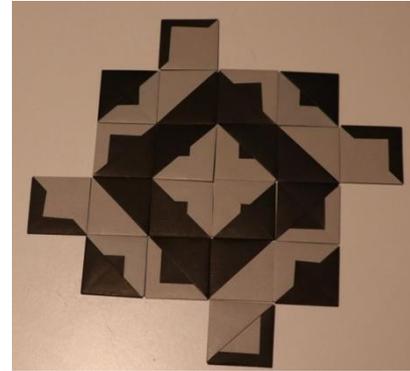

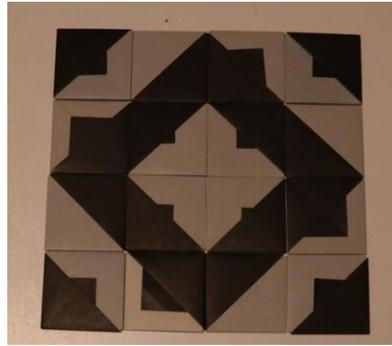

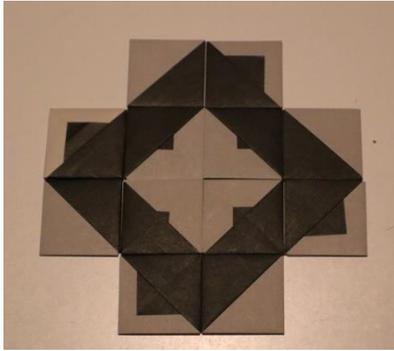

realizzare piccole composizioni prendendo spunto dall' arte

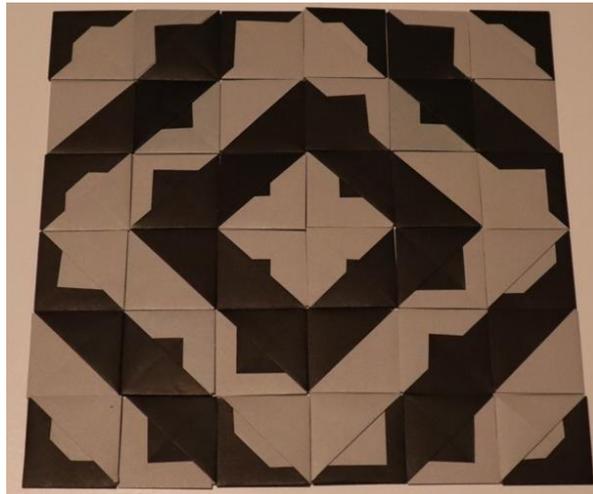

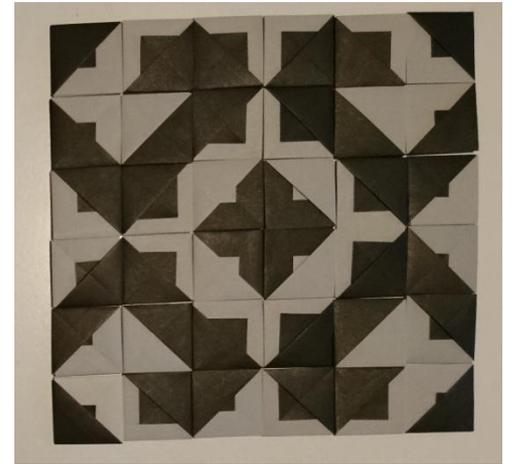

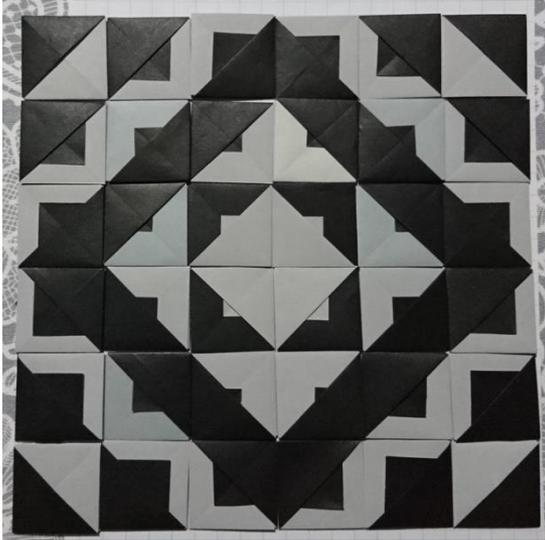

Dalle tessere aumentate di numero, di forme e di colori mi ispirarono così l'idea di alcuni giochi possibili...

# Il gioco : “AGGIUNGI”

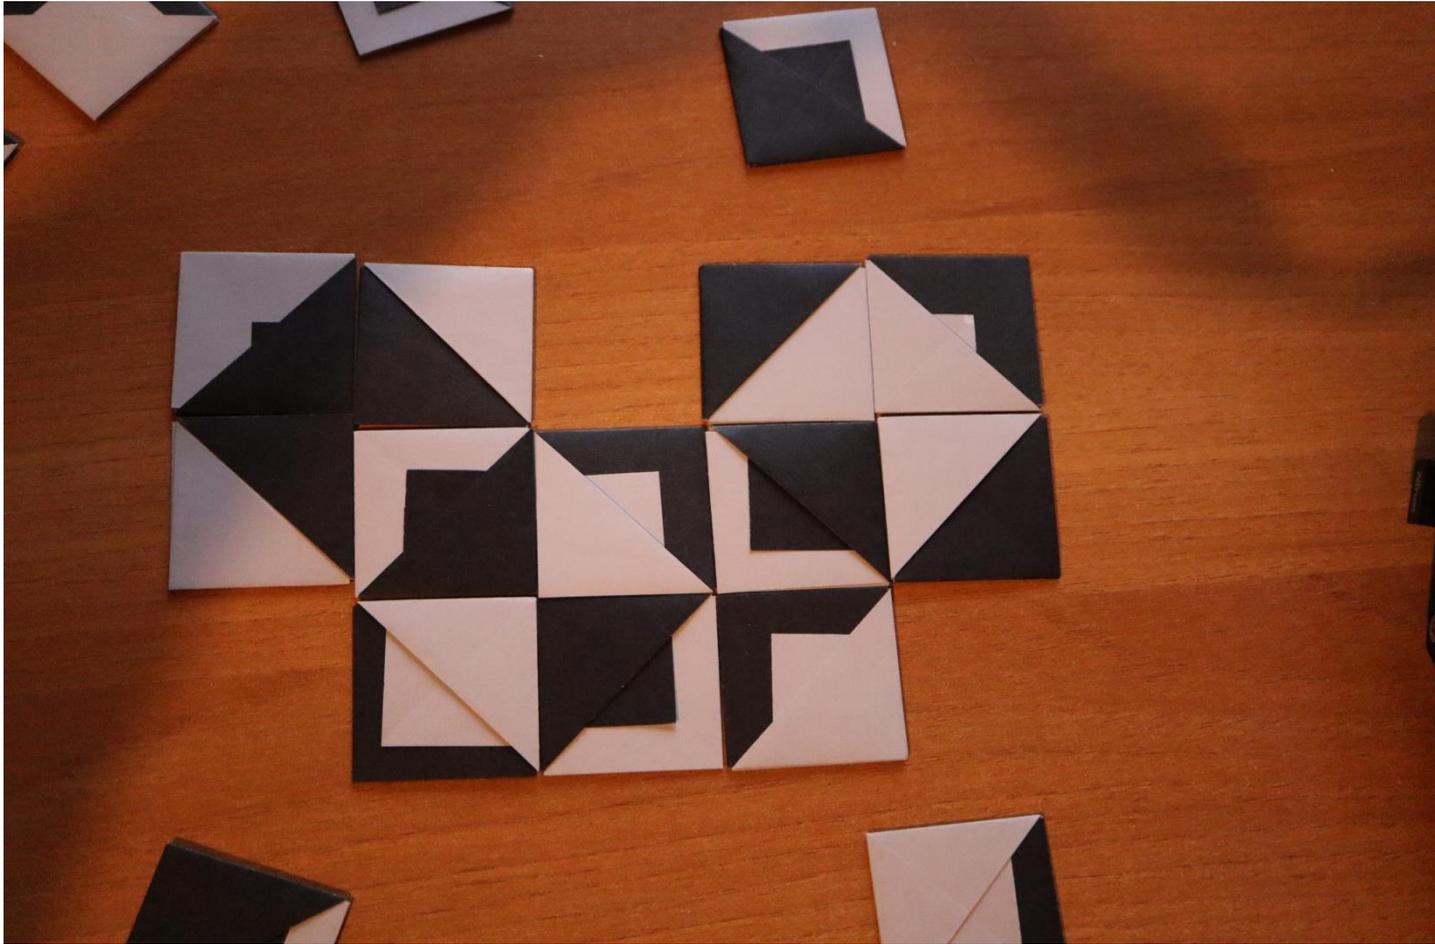

# Creazione di mosaici con 36 pezzi

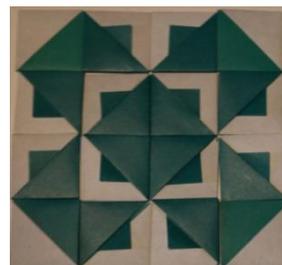

Dalla realizzazione di un modulo alla creazione di un “arazzo”

# Arte : positivo negativo

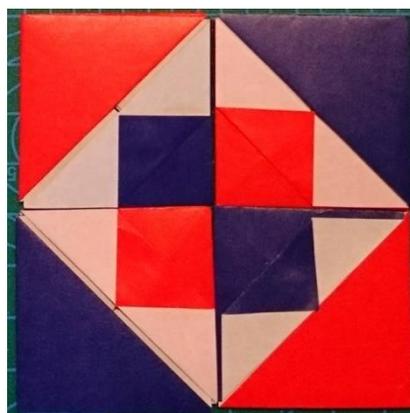

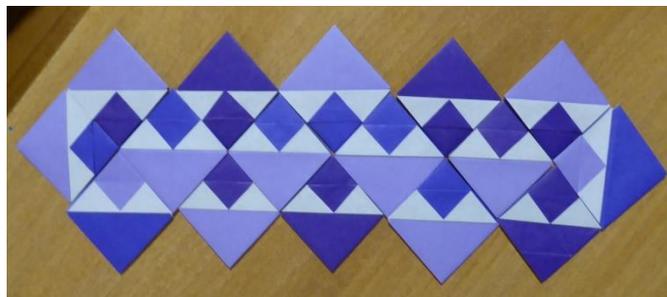

Realizzazione di piccoli mosaici 4x4 con l'aggiunta delle nuove tessere: "piccolo petalo" "cornice" e "occhio"

# Giocando con Paint

Le tesserine mosaico permettono una grande varietà di trasformazioni

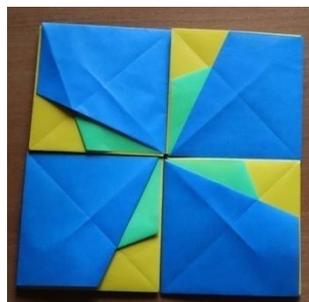

Una delle possibili combinazioni  
realizzate con le tesserine “mosaico”

# Tesserine occhio

4 a dx

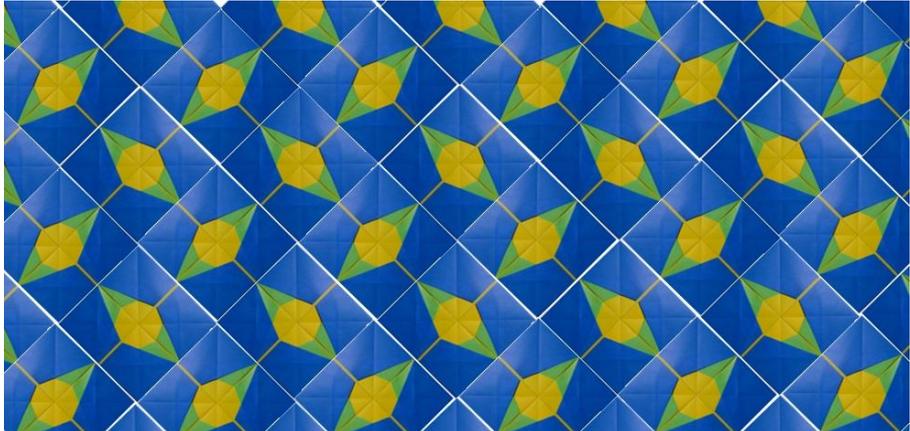

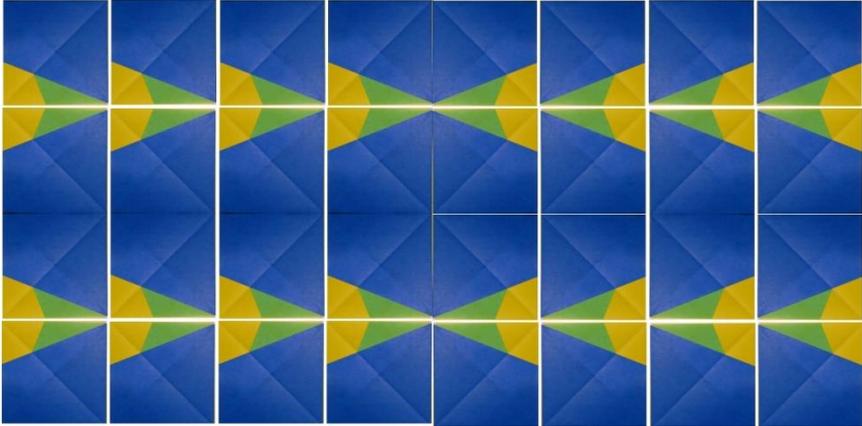

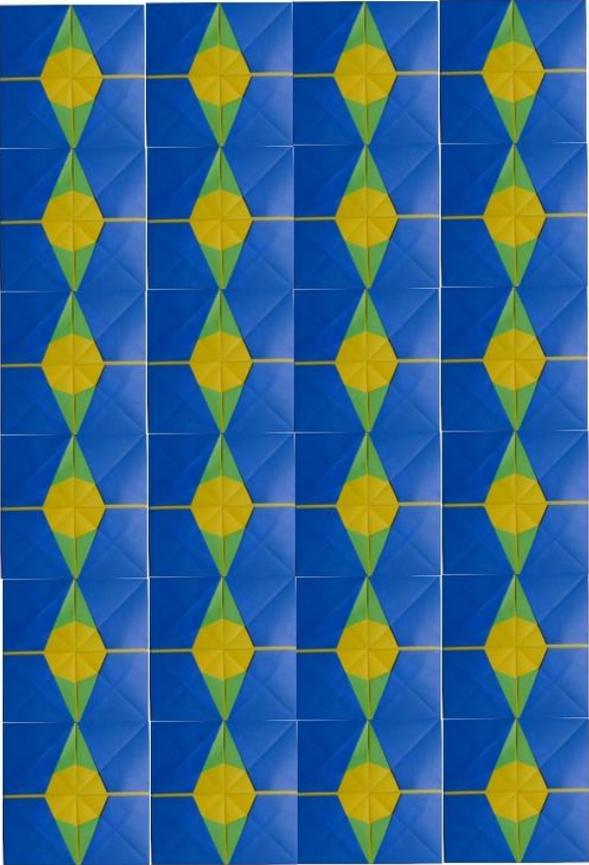

4 a sx

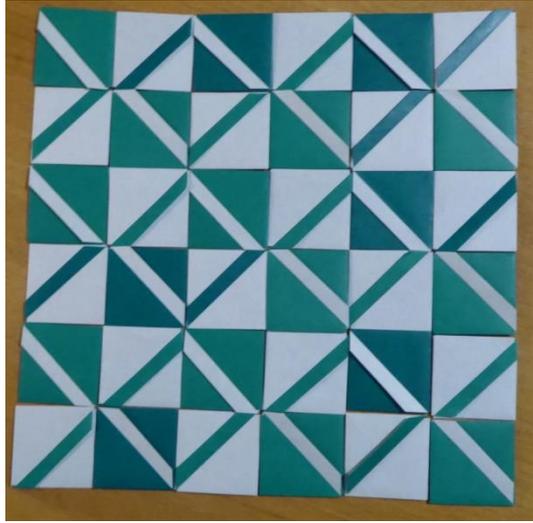

2 a dx 2 a sx

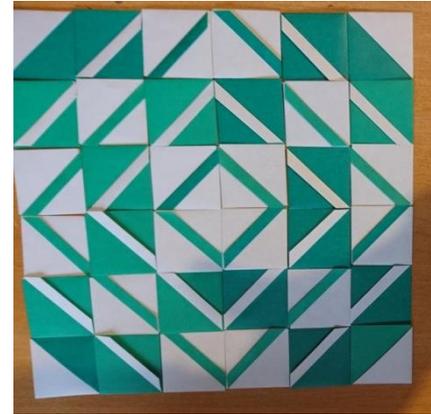

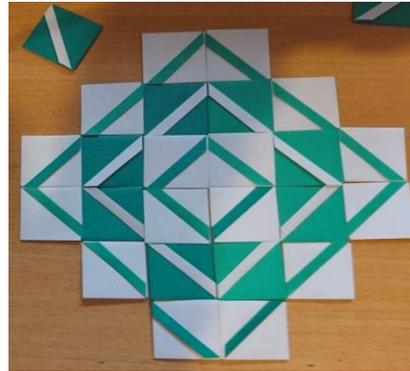

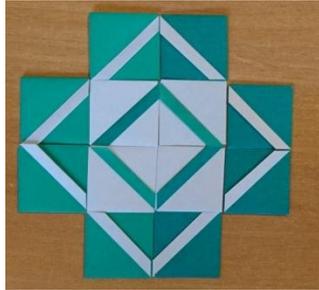

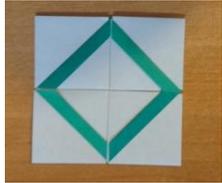

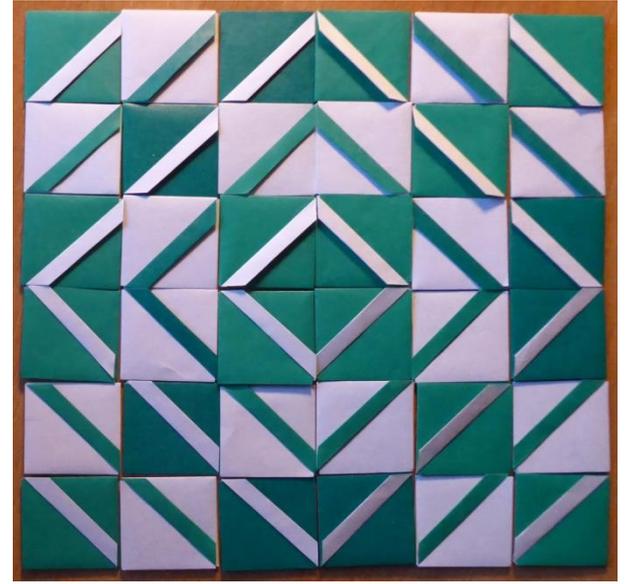

# Possibili mosaici con tessera occhio

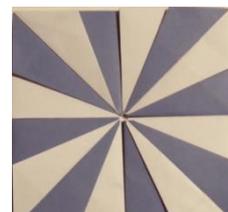

Tesserina  
cornice

# Tesserina piccolo petalo
