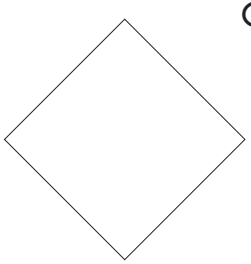
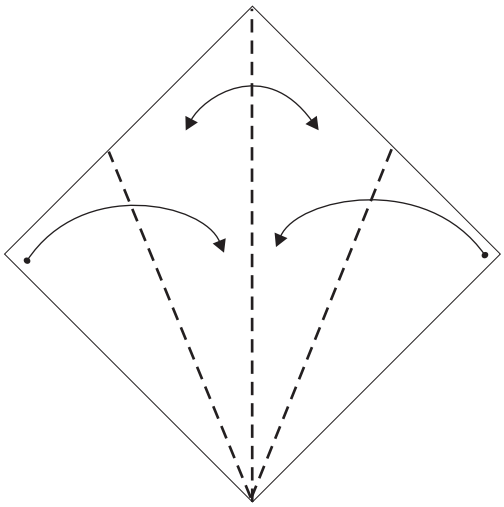
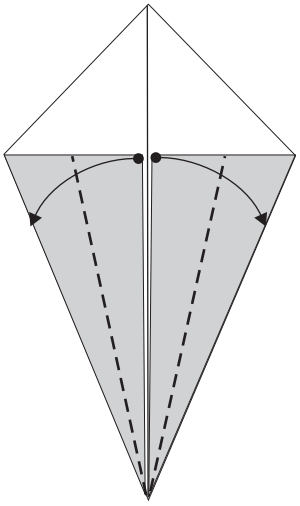
STELLA AURORA VARIANTE

Quadrato colore sotto

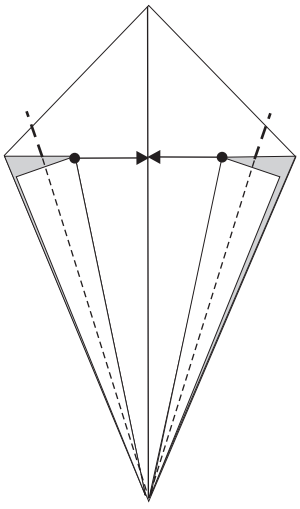




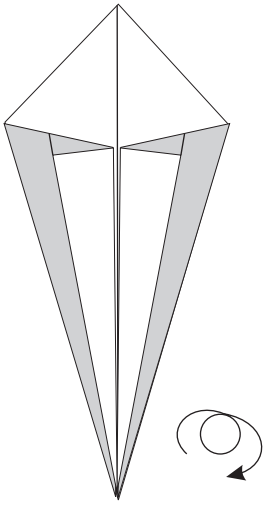
1 Piegare e riaprire una diagonale
poi portare i lati in basso su di essa



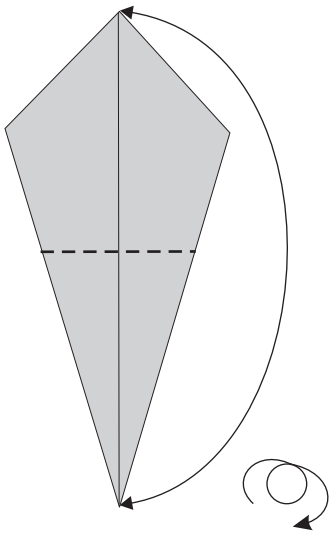
2 Dividere a metà le ali laterali
portando il lato interno
sul lato esterno



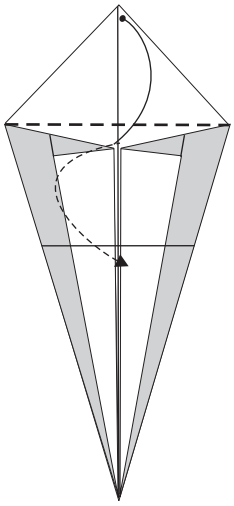
3 Portare i lati interni sulla diagonale
attraverso due nuove pieghe a valle
sulla parte posteriore



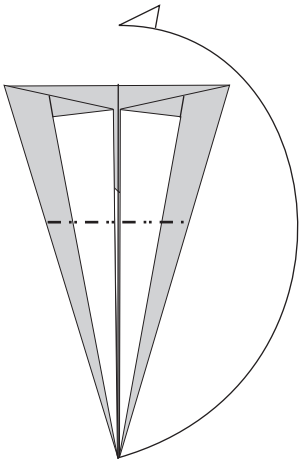
4 Voltare il modello ottenuto



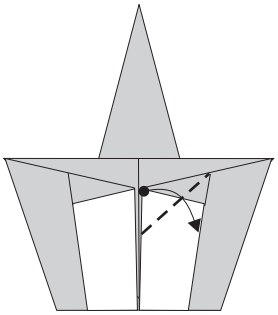
5 Portare la punta in basso sulla punta in alto e riaprire poi voltare il modello



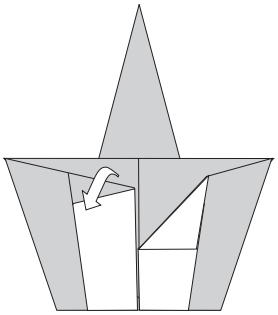
6 Inserire la punta in alto sotto le due ali laterali eseguendo una piega a valle: da punta laterale destra a punta laterale sinistra



7 Eseguire una piega a monte (precedentemente segnata al punto 5) portando indietro la punta

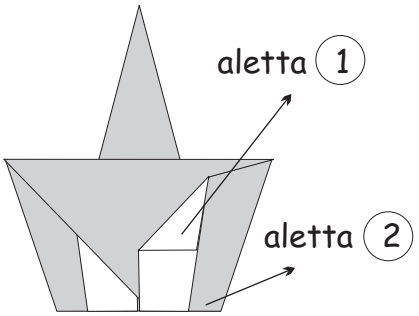


8 Eseguire una piega a valle e portare l'angolo interno di destra sulla linea



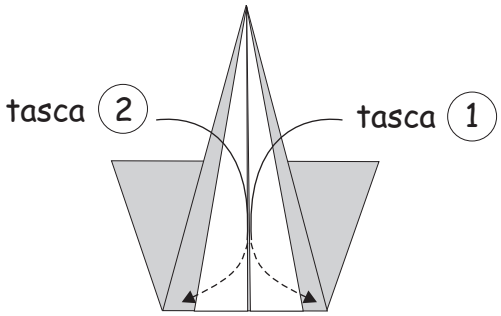
9 Portare il triangolo interno sopra l'aletta di sinistra (per agevolare il passaggio è possibile riaprire il modulo passare la parte sinistra del triangolo davanti e poi richiuderlo)

Modulo ultimato x 9



Fronte

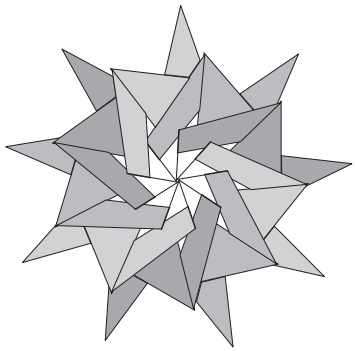
Sono presenti due alette:
una in basso con più strati
una in alto con un solo strato



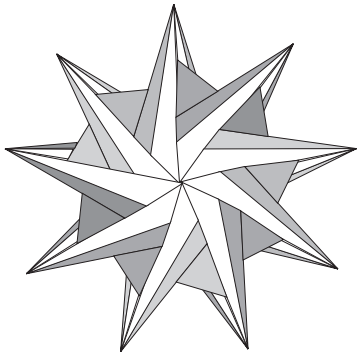
Retro

Sono presenti due tasche:
una a destra dove andrà infilata l'aletta 1
una a sinistra dove andrà infilata l'aletta 2

Unire come la Stella Aurora

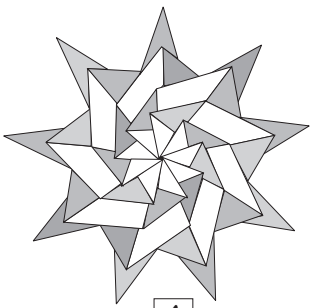


Fronte

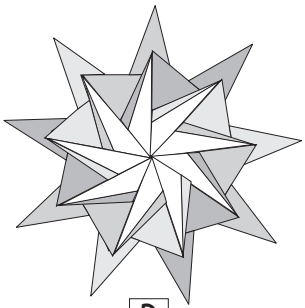


Retro

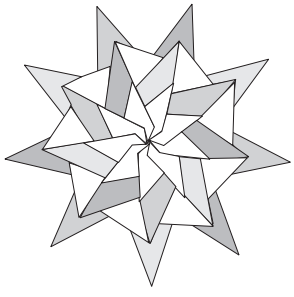
Giocando con le alette di sinistra, non utilizzate per l'incastro, se ne possono ottenere molte altre



A

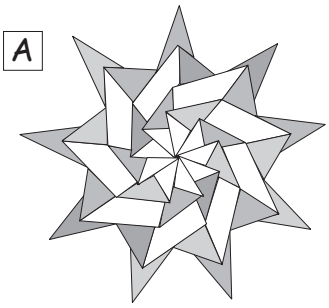


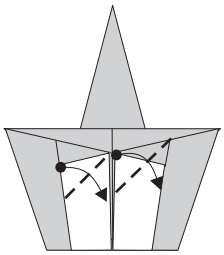
B



C

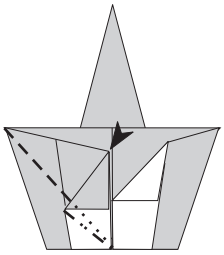
A



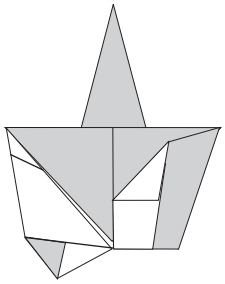


1 Partire dal passaggio "8", eseguire una piega a valle a destra e portare l'angolo interno sulla linea.

A sinistra eseguire una piega a valle e portare l'angolo del risvolto sulla linea al centro

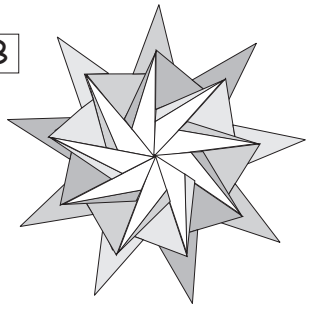


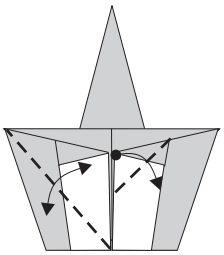
2 Schiacciare la punta interna di sinistra eseguendo una piega a valle sullo strato interno e una a monte sul lembo esterno



Modulo ultimato x 9

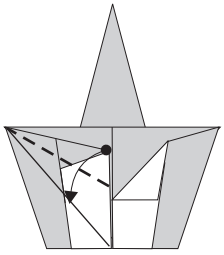
B



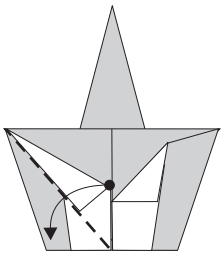


1 Partire dal passaggio "8", eseguire una piega a valle a destra e portare l'angolo interno sulla linea.

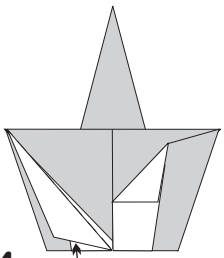
A sinistra eseguire una piega a valle, dall'angolo esterno al centro, sullo strato superiore e riaprire



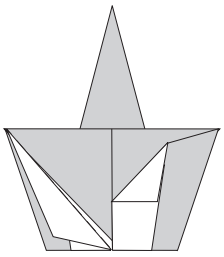
2 Portare la punta interna di sinistra sulla piega segnata al passaggio precedente eseguendo una piega a valle



3 Ripetere la piega eseguita al punto "1"

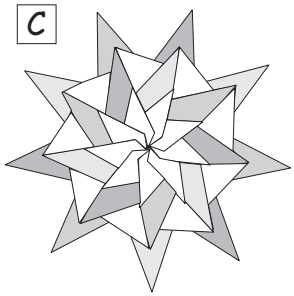


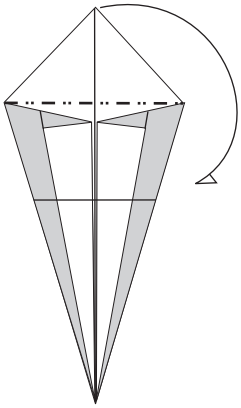
4 Bloccare dietro



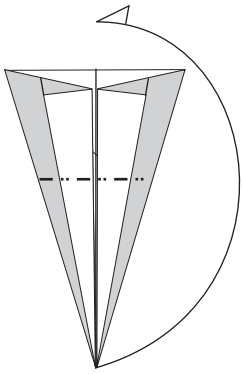
Modulo ultimato x 9

C

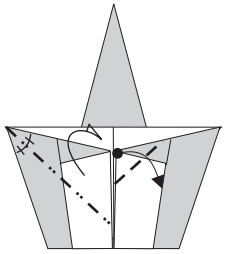




1 Partire dal passaggio "6", voltare la punta indietro eseguendo una piega a monte: da punta laterale destra a punta laterale sinistra

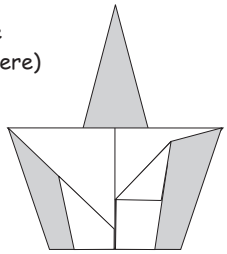


2 Eseguire una piega a monte portando indietro la punta



3 Eseguire una piega a valle a destra e portare l'angolo interno sulla linea.

Eseguire una piega a monte a sinistra rivoltando il lembo all'interno (per agevolare questo passaggio riaprire il modulo e poi richiudere)



Modulo ultimato x 9
